

MetroFlex Mass Loaded Vinyl Sound Barrier is a flexible high temperature fused vinyl that resists the passage of sound waves and reduces the transmission of airborne noise. MetroFlex MLV is an extremely dense product that is only 1/8" thick while weighing 1 lb. per square foot. (*properties of MF-10)

MetroFlex Mass Loaded Vinyl Sound Barrier is most commonly used to add mass and sound damping to building structures including walls, ceilings, and floors. Other applications include fences, on machinery/equipment, household appliances, drain pipes, doors, and over windows. MetroFlex MLV can be applied to almost any situation where unwanted noise needs to be kept out of an area.
